I created the git hub repo using the website.

Used git clone to get the repo the invite for this repo was shared with my group.

Git clone [https://github.com/tbabel-blip/ECE554SP26\\_Minilab0.git](https://github.com/tbabel-blip/ECE554SP26_Minilab0.git)

To add file to git below are the 3 commands make sure the files in the directory which is connected to git

Git add .

Git commit -m "comment"

Git push

Without IP we the hardware was less optimized because it's just the general hardware. While with the IP the hardware is optimized to the specific.
